## Description:

DESCRIPTION -

Electro-mechanical bending machine in a sturdy cast iron structure with base in press-bent sheet metal.

Three drive shafts controlled by motor reducers and tempered steel gears.

Bending increase given by lower mobile shafts with bending performed at one or three radii, in manual, semi-automatic or automatic mode.

The automatic work cycle can be paused for checks to be made.

Up to 199 different programmes in single run and 19 in multi-run can be stored in the memory.

Simplified programming for ease of use by the operator and produced in various languages

## Specification:

The CR234M is a higher-powered version as regards both mechanics and motorisation

It maintains all the electronic features described but with an increase in power performance.

The two different versions make the CR 234 series a machine which can satisfy a multitude of problems in the bending sector.

**Product Code:** PRO-415

**Country:**  Italian

**HSN Code:** 0

**Unit:** 0
